#### **Outlook for 2014**

The general economic sentiment is considered to modestly improve but the economic growth is nevertheless expected to remain subdued in 2014. The economic cycle and interest rates are not expected to bring any substantial changes to the prevailing situation in the Finnish housing market.

The management is very confident that as a specialized mortgage institution, the Mortgage Society of Finland has good possibilities to continue growing its business in a profitable manner while managing risks also in 2014. The management expects the Group operating profit for 2014 to exceed the 2013.
