S&P Issuer Credit Rating of Hypo: 'BBB/A-2' (stable)

Anchor Rating for Finnish Commercial Banks

a-

1. Hypo business position

-2

- Monoline profile as a pure residential mortgage financier in Finland
- Expectation of continued business stability partly offsets concentrated business profile

2. Hypo capital and earnings

+2

- Very strong risk-adjusted capitalization (RAC)
- Profit retention as a Mutual company, profits solely used for capital build-up

3. Hypo risk position

-1

- Strong asset quality and exceptional loan-loss track record in the past decades
- Very conservative lending and underwriting standards with a focus on urban areas
- Concentration and cyclical risk in the lending book

4. Hypo liquidity and funding

-1

- Matched funding profile but elevated dependence on wholesale funding
- Issuance of covered bonds leads to a well-matched funding profile
- Less stable deposit base than domestic peers

Hypo Credit Rating

BBB (stable)

Outlook

Future Outlook

“Share of people vaccinated against Covid-19 increases in Finland and main export countries enabling the economy to open gradually. Economic growth continues strong and broad-based although risks are still visible. Housing markets in the growth centers remain strong even after the coronavirus crisis. Urbanization continues and services in the cities recover steadily. Low interest rates, institutional investors and subsidized building support newbuilding activity to stay relatively stable. Housing loan demand remains strong in the growth centers.

Hypo Group focuses on renewal of its core systems and on strengthening its core business and expects the share of profit made by it to rise following the increase of net interest and net fee income. Capital adequacy and liquidity are expected to remain on a strong level.

The operating profit for 2021 is expected to be on the same level or slightly smaller than in 2020. The expectation contains uncertainties due to the development in economy and interest rates as well as the coronavirus pandemic.”
